PROFESSIONAL SUMMARY

Lead Engineer with 8+ years of experience building fintech-grade platforms across onboarding, custody integrations, and exchange/trading systems. At Finstreet (Abu Dhabi), developed regulated workflows for the Private Funding Platform (PFP) and contributed to an off-chain exchange stack using PostgreSQL and low-latency backend services. Hands-on across Node.js/TypeScript, ASP.NET, Go, Next.js, and FIX-based integrations, with a strong focus on reliability, performance, and auditability. Completed a postgraduate program in AI & ML (University of Texas, 3.9 GPA) and actively applying ML/analytics to real-time decisioning and platform intelligence.

PROFESSIONAL EXPERIENCE

Lead Software Engineer · Finstreet

Jul 2024 – Present | Abu Dhabi, UAE · On-site

- Led backend architecture for Exchange + Wallet/Custody-facing flows, ensuring low-latency and audit-ready processing aligned with FSRA/ADGM regulatory expectations.
- Designed and optimized off-chain trading workflows (order lifecycle, state transitions, trade events, reporting-ready audit trail) with PostgreSQL as the system-of-record and performance-tuned queries/indexes.
- Built and scaled APIs using Node.js (TypeScript/NestJS) and ASP.NET Core; supported performance-sensitive components using Go.
- Implemented event-driven integration patterns (Kafka/RabbitMQ) to handle high concurrency, ensure reliability, and support downstream systems.
- Owned and extended FIX connectivity patterns (session management, message validation, order/trade model mapping) for regulatory-friendly trade feeds.

Senior Software Engineer · Finstreet

Nov 2022 – Jul 2024 | Abu Dhabi, UAE · On-site

- Built core onboarding services for investors/issuers including workflow orchestration, validations, and status tracking, designed for compliance visibility and operational reporting.
- Developed secure API layers for onboarding modules using Node.js/TypeScript (NestJS); supported front-end integration patterns in Next.js.
- Integrated KYC/KYB providers, document handling, and notifications ensuring idempotency and consistent state transitions.
- Implemented OAuth2/JWT/RBAC auth patterns and improved performance via query optimization and caching strategies.

Development Engineer II · Comcast

Jun 2022 – Nov 2022 | Chennai, India · On-site

- Enhanced client-side performance using Redux — 50% reduction in load times.
- Developed scalable REST APIs with Python and .NET, supporting 10,000+ daily users.
- Created dashboards and analytics tools to monitor customer behavior and application usage.

Senior Software Engineer · Prodapt

Apr 2021 – Jun 2022 | Chennai, India · On-site

- Built full-stack modules with React.js and Python backend services, reducing API latency by 40%.
- Designed reusable UI components and improved database query performance by 25%.

Full Stack Developer · Sulekha

Nov 2020 – Apr 2021 | Chennai, India · On-site

- Migrated monolithic ASP.NET MVC application to Vue.js frontend and .NET Core APIs.
- Developed reusable components and actively participated in requirements analysis and agile ceremonies.

Program Analyst / Software Associate · Cognizant Technology Solutions

May 2018 – Nov 2020 | Chennai, India · On-site

- Developed microservices and APIs using ASP.NET for enterprise-level projects.
- Managed CI/CD pipelines with TeamCity and Octopus Deploy for .NET and front-end applications.
- Utilised Kibana and MSSQL for application logging, error tracking, and real-time analytics.

Project Intern · CSIR-CEERI

May 2017 – Nov 2017 | Chennai, India

- Developed real-time computer vision applications using Python and OpenCV — object detection, tracking, and video processing pipelines.

EDUCATION

Post Graduate Program · AI & ML · University of Texas

Jan 2024 – Dec 2025 (Completed) | GPA: 3.9

Bachelor of Engineering · Computer Science · Anna University

Jan 2014 – Jan 2017 | CGPA: 6.0

CERTIFICATIONS

AWS Certified Solutions Architect – Associate · Amazon Web Services (AWS) · Mar 2023 – Jan 2027

TECHNICAL SKILLS

Frontend: React.js, Next.js, React Native, Redux, Vue.js, Angular, ASP.NET Core, TailwindCSS

Backend: Node.js, NestJS, Express.js, TypeScript, Python (FastAPI/Django/Flask), Go, REST/gRPC/WebSockets

Databases: PostgreSQL, MongoDB, MySQL, DynamoDB, Elasticsearch, Redis, MSSQL, CosmosDB

Cloud & DevOps: AWS (EC2/Lambda/EKS/S3/RDS), Azure, GCP, Docker, Kubernetes, Helm, Terraform, GitHub Actions

Architecture: Microservices, Event-Driven Architecture, CQRS, DDD, Clean Architecture, API Gateways, FIX Protocol

Security & Auth: OAuth2, JWT, SSO, SAML, OpenID Connect, RBAC, Zero Trust

AI / ML: LLM, RAG, Vector Databases, LangChain, AWS Bedrock, OpenAI, TensorFlow, PyTorch

Messaging: Kafka, RabbitMQ, AWS SQS/SNS, Redis Pub/Sub
