

Name: A.D. Venkhat Balaji

Email: venkhatbalaji@gmail.com

Mobile: +91-9003164637

OBJECTIVE:

Looking to obtain a position in a leading organization where I can apply the knowledge gained in my previous organization and my bachelor's degree. I firmly believe in the principle of implementing my duties with dedication and determination. I am looking for good career growth opportunities where my talent and knowledge could be best subjected and utilized for the benefit of the organization and myself.

SKILLS:

- UI development using React.js library, JavaScript, bootstrap, css, scss, web-pack, babel etc.
- API Development using asp.net(c#).
- Web API development using AWS API-Gateway integrated with AWS Lambda function and persisting data in AWS Dynamo DB.
- Git for a version-control system for tracking changes in any set of files and also storing.
- Team City for build management and continuous integration server
- Octopus for automated deployments and release management.
- Azure devops for repos, story tacking, building and deploying.

WORK EXPERIENCE:

Cognizant Technology Solutions
Program Analyst
(May 2018 – Nov 2020)

PROJECTS HANDLED:

Project 1: Comcast (Xfinity)

Technology Used: React.js with Redux, MSSQL

Development Process: Agile process.

Tools: Git, TeamCity, Octopus, Visual Studio Code, Visual Studio, and Kibanna.

Roles & Responsibilities:

- Code Optimization: Rewriting the address search component to reduce the API calls using debounce technique.
- Worked on building various UI components which include horizontal scrolling grid matrix for installation slot selection for the users.
- Built some features like Authorizers in API Applications, Custom reusable banners for specific use cases, moving a few cookie information to the persistence service built-in AWS and many more.
- Analyzing issues using the call logs being tracked in MSSQL and also kibana logs.
- Creating dashboards and visualization using kibana.

Project 2: Xfinity Agent Order Application (Comcast - Internal)

Technology Used: React.js, JavaScript, AWS Services, MSSQL.

Development Process: Agile process.

Tools: Git, Visual Studio Code, Jenkins.

Roles & Responsibilities:

- Moving the old legacy asp.net application to new UI using React.js.
- Recreating the agent order table from MSSQL in AWS Dynamo DB.
- Created restful API service using AWS API gateway with AWS Lambda function to interact with the AWS Dynamo DB to Read, Write, and Update.
- Making Use of the Service created in the necessary applications.
- Interacting with the stakeholders and product teams to get the requirements and set the estimates to the project.
- Participating in agile ceremonies.

Project 3: Xfinity Admin Tool (Comcast - Internal)

Technology Used: React.js, JavaScript, Asp.net.

Development Process: Agile process.

Tools: Git, Visual Studio Code, Visual Studio.

Roles & Responsibilities:

- Built a single page UI application for the use of the QA folks to make use of certain feature keys.
- Made use of the existing API's from the admin application to build the feature.
- Built a login page to restrict unauthorized people to make use of the admin application.

Sulekha
Software Developer I
(Nov 2020 – Present)

PROJECTS HANDLED:

Project 1: Elearn by sulekha

Technology Used: React.js with Redux, ASP.Net, MSSQL

Development Process: Agile process.

Tools: Git, Azure Devops, Visual Studio Code and Visual Studio.

Roles & Responsibilities:

- Recreating the present mvc elearn project to React.js.
- Creating reusable ui components.
- Moving mvc controllers to new dotNet core api.
- Interacting with the stakeholders and product teams to get the requirements and set the estimates to the projects and also collaborate with the design team using zeplin.
- Participating in agile ceremonies.

APPRECIATIONS:

- Received the title “Hats off award” throughout the industry as a token of appreciation for my consistent work and many more appreciations from team and client during sprint activities.
- I was trained in React.js, Asp.Net, and AWS through CTS Academy. I was awarded an Amazon gift voucher for performing well in the training sessions.
- Secured second place in a Hackathon conducted by cognizant. Awarded an amazon gift voucher.

EDUCATIONAL QUALIFICATIONS:

Bachelor of Engineering, **MNM Jain Engineering College, Anna University Affiliated.**

DECLARATION:

I hereby declare that the above pieces of information are true to the best of my knowledge and belief.

Date:

Place: Chennai
